

Internship Partners

At Kirra, we recognise the importance of a skilled and knowledgeable workforce that is well prepared for the changing global economy.

An internship, as part of a formal learning pathway, aids the transitions from study to work. It is a vital component in enriching skills and creating a link between academic studies and authentic jobs skills, ensure our students are appropriately equipped when they transition into the working world.

“a carefully monitored work or volunteer experience in which an individual has intentional learning goals and reflects actively on what he or she is learning throughout the experience” National Society for Experiential Education (NSEE).

In recent years, there has been a growing recognition of the need to break down traditional education barriers that have long hindered students from achieving their full potential. This is particularly true in rural areas and within indigenous communities. Kirra’s Cyber Career Starter Program seeks to provide students with a more personalized and flexible learning experience, tailored to each individuals needs and learning styles.

This unique 24-week program consists of workplace skills, industry recognised certifications, career coaching and professional development and vendor training. Our interns are committed to gaining valuable experience which is directly related to their studies and essential for success in today’s employment market.

We are seeking opportunities for our enthusiastic young professionals to undertake their internships. If you have the ability to provide intern opportunities, please feel free to contact us.

Kirra Services is a Canberra-based majority-owned and Supply Nation Certified Indigenous business service provider.
