

Data Cabling

End to end cabling solutions for your business

At Kirra Services we specialise in the design, supply and install of structured cabling systems to support stable voice, data and video communication environments.

We can supply cabling in any length, colour and connector types – including copper & fibre pre-terminated assemblies, patch leads and Direct Attach Cables (DAC).

Our services cover the complete range of communications technology:

- Communications cabling
- Cat7 structured cabling systems
- Cat6 STP 10 GIG structured cabling systems
- Cat 5E, Cat6
- Microwave & wireless solutions
- ISDN and WAN – router, frame relay, private connections
- Cable assemblies & patch cords
- Cable scanning
- Voice systems
- Network design & implementation
- Fibre optic cabling networks
- OTDR and TDR testing
- LAN – Ethernet switches & hubs, token ring, ATM, IBM 3270 etc,
