CYBER CAREER STARTER PROGRAM

Our Cyber Career Starter Program is breaking down traditional education barriers to help people achieve their full potential, especially those in rural and remote areas and within Indigenous communities.

Our program provides a personalised and flexible learning experience, tailored to each individual's needs and learning styles.

This unique program consists of industry recognised certifications, delivered via weekly virtual classroom or at participants own pace. We use innovative technologies including virtual classrooms, labs, and interactive simulations, supported by tutoring and mentoring systems to help participants engage in a truly interactive and immersive way.

At Kirra Services, we understand the importance and need for community. When designing and facilitating individual programs, we aim to deliver learning outcomes that complement these needs. We are committed to working with participants to ensure they achieve the best possible outcomes for both themselves and their communities.

Kirra Services has a network of industry partners who offer on the job training through intern programs and hands on experience. This ensures that our graduates have a wide variety of skills to help them hit the ground running in the workforce.

The 24-week program includes:

- Workplace skills training
- ICT Security and Networking Fundamentals – Cybersecurity
- Learning support and mentoring from industry experts
- Career coaching & professional development, including recruitment services
- 8 Week intern program with leading industry professionals
- Ongoing access to industry & vendor training
