

Pathways

PROGRAM

In just over 12 months, we have delivered over 60 Cyber Career Starter Programs. We're passionate about continuing to invest in pathways that increase indigenous participation in ICT and create ongoing opportunities in regional and remote communities.

Tully completed our 12-week Cyber Career Starter program in 2023.

After completing the program, Tully was offered a traineeship with a leading cyber and intelligence firm and is now 1 year into a 3 year traineeship, where she is gaining valuable hands-on experience while continuing her studies.

Iteeka signed up for our Indigenous Pathways Program earlier this year - looking for a career change from the child care sector.

Since completing the course, Iteeka is exploring pathways into the public sector through a variety of opportunities.
